communities in WB and EU

University of Novi Sad Novi Sad, Serbia

T2.1 Analysis of state of art of practices within EU and Third Countries
associated with EU for fostering climate initiatives and collaboration
with government, business and academia

Sustainability Plan recommendations

Mirjana Laban

Date: 12 October 2023

Place: Eberswalde, Germany

Co-funded by the
European Union

Continuation of the innovated courses after the EU funding period

- All partners have already confirmed their commitment to continue the programs and innovated courses beyond support by EACEA.
- The programs have been in place before the project started and the continuation has not been threatened at any moment in time yet.
- All partners remain fully committed with respect to the future.
- All members of this consortium confirm the strong need for the master programs devoted to sustainability.

Measures for further development and sustainability of the studies

- Measures have already been put in place for further development and sustainability.
- With respect to financial sustainability, it would be useful to wide and continue the cooperation between the consortium members and try to win other project grants for research in sustainability issues, like EU and WB Green Deal, sustainable cities, circular economy, etc.

Thank you for your attention!
