### Introduction

In the scope of the work package 2 of the 1FUTURE project, it is foreseen to prepare and approve a Plan for Climate Action in each Higher Education Institution in the Western Balkan Countries. This plan is the product of the task 2.5 and is developed based on the findings of the previous tasks of the work package 2, specially on the results of the gaps analysis and study visits to EU partners. The gap analysis of climate and sustainability initiatives between Western Balkans (WBC) and European Union (EU) Higher Education Institutions (HEIs) revealed notable differences in terms of national legal and strategic framework; Institutional framework; Curricula; Projects and research; Services and practices.

The situation in the EU HEIs shows comprehensive sustainability integration in the institutional framework; a holistic and structured approach to sustainability education, with focused programs and broader integration; engagement in broader and interdisciplinary research; different services and practices focused on climate and sustainability.

While the WBC face challenges in aligning with international standards, limited use of resources, and early-stage implementation; lack of specific institutional frameworks; lack of curricula focused on Climate Change and Sustainability Practices; disparity in SDG integration across various specialized programs; research and projects with a more focused approach; in providing services and practices addressing climate and sustainability challenges.

Addressing the identified gaps between WBC HEIs and EU HEIs in climate and sustainability initiatives can yield significant benefits for WBC HEIs. Closing these gaps elevates the international standing of WBC HEIs, fostering recognition for their commitment to sustainability and aligning with global standards. Aligning with EU practices opens doors for collaboration, joint projects, and research partnerships, providing WBC HEIs with access to broader networks and resources.

**Co-funded by  
the European Union**

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or EACEA. Neither the European Union nor the granting authority can be held responsible for them.”

The aim of the Plan for Climate Action is to close these gaps by implementing a climate agenda in the future in WBC HEIs. Its approval and implementation will position WBC HEIs as key contributors to national sustainability efforts, fostering positive impacts on education, research, and environmental protection.

## 1 Chapter 1: Higher Education and Climate Action

The Plan for Climate Action aims to complement our research, teaching and learning activities in support of sustainability. We propose to have 7 areas of implementation with focus on Climate Action as a crosscutting thematic area, in recognition of the critical nature of the climate crisis. While the lifetime of this plan is planned to cover the years 2024 – 2029. The plan will seek to have longer lifetime, and to build different collaborations schools, businesses, units and student organisations across the Faculty.

The vision of the Faculty of Civil Engineering (FCE) is related to be a high-quality Public Institution of higher education and a leader in its fields of expertise. It aims to improve and consolidate academic training and solving important research and scientific problems on a national and regional scale.

With the approval of this plan, the Faculty of Civil Engineering aims to be a leading faculty on implementing Climate and Sustainability action, through research, demonstration of best practice on campus, and education of current and future leaders and decision makers.

The general mission of FCE is based on honesty, curiosity, creativity, freedom of spirit, cooperation and transfer of knowledge in the field of science and education for a sustainable development.

Moreover, with the approval and implementation of this plan for climate action, the Faculty of Civil Engineering aims:

- To facilitate the development and empowerment of future leaders in sustainability through research, teaching and learning activities.

**Co-funded by  
the European Union**

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or EACEA. Neither the European Union nor the granting authority can be held responsible for them.”

- To engage students, staff and wider community in becoming active citizens for sustainability.
- To minimise the environmental impacts of our educational, research, and infrastructural development on local, regional and global scale.

## 2 Chapter 2: Sustainability and Climate Action Plan Overview

This Plan will be developed through the following areas of action. The areas have been conceived following the action priorities of higher education institutions. For each area, the purpose of proposing concrete action is highlighted.

### 2.1 *Environmental Sustainability in Academics: Learning, Teaching and Research*

- To facilitate the development and empowerment of both current and future leaders in sustainability through our teaching and learning activities. To foster sustainability literacy through both formal and informal learning opportunities.
- To facilitate the development and empowerment of future leaders in sustainability through our research activities and, in doing so, maintain and enhance the University's standing and leadership in research on sustainability topics.

### 2.2 *Sustainability Citizenship*

- To support, enable and influence our students, staff, and wider community in achieving the SDGs and establish Sustainability Citizenship as a core ethos of HEIs.

**Co-funded by  
the European Union**

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or EACEA. Neither the European Union nor the granting authority can be held responsible for them."

- To be transparent, accountable, and inclusive and to place the just transition as a core element of our programmes.

### ***2.3 Climate Action***

- To build and operate within HEIs carbon budget and mitigate the impact of climate changes on our country, while acting as a leader for climate action locally, regionally and nationally aiming to achieve net zero emissions by 2050.

### ***2.4 Waste Reduction and Circular Economy***

- To minimize the local, regional and global environmental impacts of our educational, research, operations, and infrastructural development.
- To make reuse the first option and promote a circular economy approach at all times.

### ***2.5 Landscape and Natural Resources***

- To promote engagement with campus green space amongst campus and local community.

### ***2.6 Commuting and Active Travel***

- To promote the use of more sustainable methods of commuting amongst our staff and students.
- To capitalize on the opportunities, to reduce our transport related emissions.

**Co-funded by  
the European Union**

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or EACEA. Neither the European Union nor the granting authority can be held responsible for them.”

### 2.7 Food Health and Wellbeing

- To enhance the health and well-being of the University and wider community through the facilitation and promotion of aspects of healthy eating and living as an integral part of sustainable living

## 3 Chapter 3: Monitoring and Reporting

The newly created Knowledge HUBs for Climate and Sustainability (KHCS) will have overall responsibility for reporting and communicating the associated outcomes. For each action or group of actions, an action group will be established to oversee the development of targets and ensure successful delivery. The action group will be consisted of 1 representative from the KHCS staff, 1 PhD student and 1 administrative staff from FCE. Each action group will produce Sustainability Reports outlining progress against each action and target within this plan. The responsible of the KHCS will report to the dean of the faculty progress of the action plan.

The KHCS will continue to act as open spaces for staff and students within Faculty of Civil Engineering to drive innovative and impactful projects and initiatives for the entire FCE community.

**Co-funded by  
the European Union**

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or EACEA. Neither the European Union nor the granting authority can be held responsible for them.”

## 4 Action Plan

No.	Areas	Goals	Activities	Outcomes	Deadline	Responsible Parties	Priority
1	<b>Environmental Sustainability in Academics: Teaching, Learning and research</b>	<ul style="list-style-type: none"> <li>- Promote scientific research in the field of environmental sustainability.</li> <li>- Reduce the environmental impact of our research practices.</li> <li>- Support our teaching staff to integrate the SDGs into their curricula where appropriate.</li> <li>- Ensure every student at DEE is exposed to the global sustainability agenda and this action plan</li> <li>- Promote collaboration and transdisciplinarity.</li> </ul>	<ul style="list-style-type: none"> <li>- Support researchers to understand where their work impacts on the SDGs and environment.</li> <li>- Presentation of environmental sustainability principles and SDGs to students and teaching staff.</li> <li>- Support academic community to develop interdisciplinary collaboration.</li> <li>- Develop sustainability and climate action continuous professional development courses for policy makers, businesses and communities.</li> </ul>	<ul style="list-style-type: none"> <li>- Curricula and research mapped to SDGs</li> </ul>	2027	Action groups	
2	<b>Sustainability Citizenship</b>	<ul style="list-style-type: none"> <li>- Align the sustainability programme with relevant FCE strategies including teaching and learning and research strategies.</li> <li>- A sustainable FCE building</li> </ul>	<ul style="list-style-type: none"> <li>- Offer SDG training for FCE staff and students.</li> <li>- Develop a coherent and transparent Sustainability reporting process.</li> </ul>	<ul style="list-style-type: none"> <li>- All FCE staff and students trained about SDGs</li> </ul>	2026	Project team	
3	<b>Climate action</b>	<ul style="list-style-type: none"> <li>- Implement and adapt our institutional management policies and infrastructure to mitigate the impacts of climate change.</li> </ul>	<ul style="list-style-type: none"> <li>- Continue best practice energy conservation, construction and reconstruction, behavioural</li> </ul>	<ul style="list-style-type: none"> <li>- Less carbon emissions.</li> </ul>	2029	FCE administration
